- Problem-solving;

Vadym Martseniuk

Front-end Developer

SUMMARY

I am a developer with experience in web technologies. I have strong skills in HTML, CSS, and JavaScript, to create beautiful frontends. So I want to take up the position of Front-end developer with the possibility of improving my skills and learning new technology.

I'd like to work in the office, but I am also looking at remote work options.

I want to find a place where interesting and complex projects are developed using the latest technologies, to consolidate and improve development skills. I strive to write high-quality and clean code, as well as ready to support someone else's and outdated code.

EDUCATION

UNIVERSITY (National University of Food Technologies)

DEGREE IN (Specialist's degree / Information Management Systems and Technologies),

NOTE: Graduate in 2016
